

Managing Technology Peopleography

by *Diane Kester*

The demands made on librarians as they seek solutions to managing technology are many. One individual cannot be expected to become an expert on every application, software, or resource. With this issue of *North Carolina Libraries* we begin the database of persons in the state who are willing to share their expertise in specific areas of technology. The following people have submitted their names to begin this database of resource people. If you would like to be added, please write, fax or e-mail your name, library/school, mailing address, phone, fax, e-mail address, and the category(ies) with which you will be willing to help others in a time of need. The data will be gathered and published electronically, thus creating a database of human resources or a peopleography!
